Leica Exchange
Transfer your data easy, fast and safe

EXCHANGE

■ No delays
As soon as the job is complete, work can be remotely transferred back to the office for quick verification before the field team leaves the site. The office team can immediately start processing the data, and if needed instruct the field team to collect additional data. Eliminate delays, finish jobs faster and avoid costly site re-visits.

■ Up-to-date
In dynamic environments designs are constantly changing, and the most up-to-date design files are needed at all times to avoid re-work. With Leica Exchange, design teams can easily send the most up-to-date design data to field crews who are instantly notified that new data is available. With the most up-to-date data, expensive re-work can be avoided.

■ Instant Guidance
Field crews are constantly confronted with decisions on how to proceed. In most cases they can decide themselves and continue, but there are times when expert assistance is required. With Leica Exchange, field crews can simply send a photo taken with the built in camera back to the office team and receive guidance how to proceed.

🔒 TRUSTED SERVICES

- when it has to be **right**

Leica Geosystems

TRUSTED SERVICES

Your benefits:
- Optimised workflow
- Increased productivity
- Maximum security

With Leica Exchange and other software services you increase your productivity and benefit from state-of-the-art IT infrastructure. That alone would not be enough, if your data were not also safe and protected. That is why Leica Geosystems integrates the highest level of security in Leica Geosystems Trusted Services – and with it you profit from both increased productivity and maximum security.

EXCHANGE

Your benefits:
- Easy-to-use
- Instant notifications
- Integrated into the measurement process
- No limits to worry about
- Field and office solution

Transfer objects easily between the field and the office with Leica Exchange. The yearly Leica Exchange Service allows an unlimited number of exchanges to an unlimited number of users. All you need is:
- 1 year Leica Exchange subscription
- myWorld @ Leica Geosystems account to administer users
- Leica Captivate or Leica SmartWorx Viva activation
- Leica Infinity office software

Several levels of Leica Exchange are offered, all providing the same exceptional functionality. To get started immediately, apply for a trial subscription via myTrustedServices in myWorld @ Leica Geosystems.

my World

Your benefits:
- Centrally manage users and view statistics
- Send/receive files from any PC

myWorld @ Leica Geosystems is accessible from any computer with internet connectivity and allows you to manage your users and view the latest subscription statistics.
In addition, myWorld can optionally allow simple file transfer; again from any PC with internet connectivity, without requiring the installation of local software.

Leica CS20 & Leica CS35	Leica Infinity	Leica Captivate	Leica Nova & Leica Viva

With an integrated WiFi and/or 3.5G module (GSM/GPRS/UMTS), your Leica CS20/CS15 controller and Leica CS35 tablet computer simply connects directly to the internet to easily send and receive objects directly in the field using Leica Exchange.

Leica Infinity seamlessly integrates with Leica Exchange. Easily select data from your local computer, storage media or network and send it directly to any office or field crew. Work directly with objects with no limitations on file sizes. Dataflow is perfectly optimised with an integrated solution that does not rely on complex ftp systems or limited email systems.

Leica Exchange is seamlessly integrated into the easy-to-use Leica Captivate and Leica SmartWorx Viva software to allow you to work with objects rather than individual files. Once you've logged on via a secure connection, you are instantly notified once objects have been sent to you, and you can easily send completed jobs back to the office... all without leaving the field software.

Simply connect your Leica Nova MS60/TS60 or Leica Viva TS16 to a mobile phone with a Bluetooth® or WLAN wireless connection to gain internet access and easily send and receive objects directly in the field using Leica Exchange.
