Leica Geosystems
Licence Activation Guide

Option Activation for GR10/GR25

Dear valued customer... Thank you for purchasing a licence for our product. The following instructions will guide you through the licence activation process.

☞ Please register your product at myWorld.leica-geosystems.com, our internet platform for our customers. myWorld provides 24/7 access to all information you require to actively manage your equipment. Here, detailed information on individual products and their service history can be found. The information also aids in maintaining the product value while at the same time enabling maximum efficiency and productivity.

Activate option ☞ The procedure is valid for any licence key.

Step	Description	
1.	Turn on the product.	
2.	Go to **Receiver setup\Tools\Options**.	
3.	To type in an option key: **Key:** Enter the option key. The key is contained in the option file. You can copy and paste the key into the field. Press 🟢 to install the option.	To upload an option key: Press 🟢 to upload a new option from the computer to the receiver. Opens the **File upload** page.
☞	If a software maintenance licence was activated refer to "Update software" to update the software on the product.	

Update software **Via myWorld:**

3.	Go to **myProducts** and select your product.
☞	If your product is not in the list, click **Add Product**.
4.	On the **Software** tab, look in the section **Automatic Online Software Update**.
5.	Click **Start Update**.

- when it has to be **right**

Leica
Geosystems

Via web interface:

Step	Description
1.	If your receiver is installed remotely, open a browser window to access the receivers web interface and log in.
2.	Go to **Receiver Setup\Tools\Firmware**. Check the available firmware updates. If a new firmware file is available, press the **Download form Leica website** link to download the file to your PC.
3.	Click the **Upload new firmware file** button.
4.	Click the **Browse...** button and select the new firmware file.
5.	Click the **Upload** button to copy the file to the SD Card.
6.	You will be directed back to the **Firmware management** page once the file upload is complete.
7.	Click the **Install** button to install the new firmware. This may take several minutes.
8.	The receiver will automatically reboot following the installation of the new firmware and you will be directed to the **Log in** page.
9.	To verify if the installation was successful go to the **Status\Receiver Information** page and view the installed firmware versions.
